

ONLINE PRESENTATION *The Trojan War based on Archaeological Findings*

The “Bodosakis Foundation” (www.blod.gr), launched a series of online video-lectures with free access. In this frame, invited K.S. Giannakos to present the subject: “*The Trojan War based on Archaeological Findings*”. In practice, the presentation constitutes an ‘*extended summary*’ (with more pictures and figures) of five (5) of his published articles – after peer review – in (a) Archaeological Journals [Giannakos 2019b; 2016] and (b) proceedings of Archaeological Conferences [Giannakos 2019a; 2015; 2013]; these articles are cited (with the links to download them) below (cf. References). The presentation clarifies in details the author’s “working hypothesis” on a ca. 1400 BC Troy’s conquest, after “*a conflation of raids from ‘one-or-more centuries’ before the alleged dates of Greek literature*”, that is beginning at 1534(+) or 1336(+) BC until post-1200 BC [according to professor Trevor Bryce].

The enriched English version has been uploaded in the link: <https://www.blod.gr/lectures/the-trojan-war-based-on-archaeological-findings>.

In www.blod.gr, the narrating presenter and the corresponding power-point slides are presented simultaneously on the screen. The spectator disposes the possibilities (a) in the “full-screen mode”, to re-arrange the magnitude/width of the power-point slide vs the presenter, on the screen and (b) to freeze the image in order to watch (and examine) the slide thoroughly; furthermore, a full list (120 works) of the used Bibliography and an Abstract are also included, separately.
